Projects

1. Weather App with GUI
- Developed a weather application using Java and JSON library to fetch and display weather data from an API.
- Implemented a graphical user interface (GUI) for user interaction and visual representation of weather information.
- Handled error handling and user input validation to enhance the application's robustness.

2. **Ping-pong Game**
1. Developed a classic Ping-pong game using Java, featuring graphical user interface (GUI) elements for player interaction.
2. Implemented game mechanics such as paddle movement, ball physics, and collision detection to create an engaging gaming experience.
3. Utilized Java's Swing library for GUI components and event handling.
4. Incorporated features such as scoring, game reset, and sound effects to enhance gameplay.

Experience
